Executive Summary:

The Commonwealth has contracted the Acquisition and Support of the AIR2025-6 capability to BAE Systems Australia under two separate contracts. We are seeking capabilities that allow further innovation and contesting of more work packages to be contracted to SMEs. This Public AIC Plan is for the Support scope of work.

The AIR2025-6 will include the upgrade of the following mission systems:

- Maintenance Support System
- Training Facility
- Operations Support System
- Engineering Support System
- Operational Facilities

Under the Contract BAE Systems has committed to deliver the aims of the program, which are to provide value for money, and meet the current and future Australian Defence Force and Industry capability requirements. The key contract enabler is the provision of increased certainty of work for industry that delivers the ability to reduce costs over the contract period. BAE Systems has established strategic arrangements with the following subcontractors based on a number of factors which include but are not limited to:

- their ability to meet the technical requirements,
- their commitment to the aims of the program,
- schedule adherence and
- value for money

The contract duration for the Support phase is 10 years from effective date.

The current estimated contract value for BAE Systems for the Support Contract is \$529,762,309 AUD as at April 2018.
